

RackSolutions provides customized solutions to quickly meet the challenges SoftLayer faces during periods of rapid growth.

The best rack for the job

RackSolutions is a market leader in datacenter racks and accessories. The company prides itself on offering tailored, easy-to-implement, scalable products to fit any customer's racking needs. The majority of the server racks, cabinets, shelves and mounting products are designed and built on site at the RackSolutions headquarters in Greenville, Texas. With complete stocking and distribution capability, its fulfillment center processes parcel and freight orders daily, and most orders ship the same day. RackSolutions' distribution facility in Manchester, United Kingdom serves the European market.

In order to meet production standards and quick prototype turn-around times, RackSolutions opened its own metal fabrication plant in 2005.

RackSolutions' 40,000 square foot warehouse is the centerpiece of its distribution capability.

SoftLayer began purchasing server racks from RackSolutions in 2005. Today, there are hundreds of RackSolutions server racks in SoftLayer datacenters. The open frame rack, used by SoftLayer, is economical, easy to assemble and includes many options to support the various systems used in SoftLayer's datacenters. RackSolutions provides customized solutions to quickly meet the challenges SoftLayer faces during periods of rapid growth. As designer, manufacturer and distributor, RackSolutions is able to quickly supply products that meet SoftLayer's demanding needs. The RackSolutions team takes pride in satisfying SoftLayer's datacenter challenges quickly and economically.
